Polygenic Scores for Cancer Prevention

2 March 2022, 17:00 CET

Secure your place
today!

What is the current **status of research on polygenic scores**?

What are the main **opportunities and limitations** of polygenic scores for cancer prevention?

How could polygenic scores be applied clinically for cancer prevention in the future?

Join us for the sixth *World Cancer Report* Updates webinar to find out.

CHAIR: Dr James McKay, Deputy Head, Genomic Epidemiology Branch, International Agency for Research on Cancer (IARC/WHO)

SPEAKERS:

- Dr Linda Kachuri, Postdoctoral Scholar at the University of California San Francisco and incoming Assistant Professor in the Department of Epidemiology and Population Health at Stanford University, USA.
- Dr Nilanjan Chatterjee, Bloomberg Distinguished Professor of Biostatistics and Genetic Epidemiology at John Hopkins University, USA.

The European Code Against Cancer, 4th edition

12 ways to reduce your cancer risk

Latest evidence, myths and controversies

Differentiate between myths and reality

SELF-PACED LEARNING PROGRAMME

Cancer Prevention Europe

Cancer Prevention Europe launched a multilingual online programme on primary and secondary prevention of cancer, primarily targeted to managers of cancer leagues, cancer prevention advocates, and health promoters. The programme consists of two sets of self-learning modules.

The first set of modules, on the "European Code Against Cancer 4th edition", has **a module for each of the 12 recommendations in the Code** and an additional module on the methodology followed in developing the Code.

The second set, on the "Latest evidence on cancer prevention, myths and controversies", presents the latest evidence on cancer prevention, published after the launch of the Code in 2014 until today, and tackles some **myths and controversies related to the topics addressed by the 12 recommendations** of the European Code Against Cancer 4th edition.

RECORDED LECTURES

SELF-PACED LEARNING RESOURCES

Laboratory and Sample Management

Don't miss the three new self-paced learning resources on the IARC Learning - Biobanking platform!

1. Analysing the **Impacts of COVID-19 on Laboratory Management**
2. Sample Security and Quality Assurance of Samples in **Multi-National Projects**
3. The Management of **COVID-19 Samples**

The three resources each include a lecture by Dr Zisis Kozlakidis, Head of Laboratory Services and Biobank, International Agency for Research on Cancer, presented as part of the BCNet activities in 2021, and a short quiz to test your knowledge.
